PROFESSIONAL SUMMARY

Final-semester Computer Science & Engineering student specializing in software quality assurance, with practical experience in real-world testing projects involving manual testing, Playwright-based automation, and API testing with Postman. Committed to building reliable software through structured test planning, cross-browser automation, defect prevention, analysis and documentation. IELTS 8.5/9.0.

SKILLS

Testing & QA: Manual Testing (Functional, Regression, Smoke, UI, Usability), Test Plan & Test Case Design, Bug Reporting & Defect Tracking, SDLC/STLC

Automation: Playwright (JavaScript)— cross-browser execution, Selenium, Page Object Model (POM), Allure Reporting

API Testing: Postman, REST API Validation, Request/Response Integrity, UI-API Mismatch Analysis

Tools: VS Code, Git & GitHub, JIRA, Chrome DevTools, CI/CD Pipelines (basic)

Programming Languages: JavaScript, Java, SQL

Soft Skills: Agile/Scrum, Requirements Review, QA Documentation, Defect Lifecycle Management

PROJECTS

UI Test Automation Framework

February 2026

Web Application Automation

Playwright, JavaScript, Page Object Model, Allure

- Independently designed and built an end-to-end UI automation framework using Playwright and JavaScript following Page Object Model
- Executed automation scripts across multiple browsers (Chromium, Firefox, WebKit) to verify consistent application behaviour and detect cross-browser issues
- Automated core purchase flows and edge-case validations, covering key functional user journeys end-to-end
- Performed UI verification and business logic validation to catch functional and visual defects
- Configured Allure reporting for structured, stakeholder-ready test execution reports, improving QA visibility
- Applied reusable object-action separation enabling both modular and sequential test execution

Manual & API Testing

October 2025

E-Commerce Web Application

Postman, Chrome DevTools, QA Documentation, Google Workspace

- Designed and reviewed functional requirements to plan and ensure complete test coverage across all core user journeys
- Authored a full test plan and 24 well-structured test cases covering search, product variations, cart, and checkout workflows
- Identified, documented, and tracked 18 defects (UI, functional, and data-consistency) with severity classification
- Conducted REST API testing with Postman to validate request/response integrity across all critical endpoints
- Used Chrome DevTools to analyse network traffic and identify 10 UI-API mismatches, improving overall product consistency
- Produced complete QA documentation: test plans, test cases, defect reports, analysis notes, and test sign-off artifacts

EDUCATION

Bangladesh University of Business and Technology (BUBT)

2022 – Present

Bachelor of Science in Computer Science and Engineering

Expected Graduation: 2026

TRAINING AND CERTIFICATION

Ostad

2025 – 2026

SQA: Manual & Automated Testing

LANGUAGES

English – Fluent · IELTS 8.5/9.0 (Speaking 8.5, Reading 8.5, Listening 8.0, Writing 8.0)

Bengali – Native
